

Operation Engineer - Job description

The opportunity

We have a unique opportunity for a talented individual to join a fast-growing start-up. You will start as an operation engineer, will be working in the delivery team to provide insights and recommendations to our clients: some of the biggest retailers in the world.

Amoobi is a flourishing and growing company, looking for the best employees to help us facilitate a revolution in retail, by optimizing store and category layouts to customer behaviour. Amoobi is a leading international provider of in-store optimization based on customer behaviour data, through the use of various technologies offering new data sources (people tracking via automated camera analytics, etc.) and our staff's retail expertise. Our projects vary from concept store improvement, store estate clustering, customer service optimization, store in store business cases, store performance check-ups, category reviews and many more. We provide not just data analytics, but add value by interpreting the data and helping our clients convert these insights into strategic actions. We work with top retailers in Grocery, Consumer Goods, DIY and Electronics: Walmart Group, Tesco Group, IKEA, Media Markt, Carrefour, Delhaize, Metro Group amongst others.

Your fit with Amoobi's culture is a key success factor to join the team. At Amoobi, we strive to provide industry leading quality in everything we do. We reach that through our commitment to support our fellow co-workers and to deliver the best insights for our clients. Above everything, we focus on the team and our ability to progress together while having FUN. To apply to Amoobi, consider how you can bring fun to the team and help us deliver high quality insights, via an extraordinary commitment to the team and to our mission.

As part of the Delivery team of an innovative scale-up company, you will be required to bring your creativity and new ideas to contribute to the development of Amoobi.

Due to the significant increase of demand for our expertise, we are looking for a new colleague to help us deliver our projects on time. The successful candidate will be able to precisely use our internal software's to match every project challenges. You will be able to shape our internal software to better suit the process and provide the right set of data and metrics to answer our customer's needs. To do so the candidate will be able to calibrate the system to enable good quality analysis and turn every project into a success.

As part of Amoobi, you will have the opportunity to evolve in a more technical role (to develop our products) or to develop your analytical skills (to develop our recommendations to our customers).

Desired Skills and Experience

The ideal candidate will have the following experience:

- You have between 0-3 years of experience in a computer oriented field working with data
- You are used to follow process and guidelines as well as challenging them for improvement
- You have the ability to quickly understand, challenge and work with data & metrics

The ideal candidate will also possess the following skills:

- Knowledge of SQL is mandatory
- Working with UNIX-like command line tool is a plus
- Rigorous with a strong attention to details
- Like to understand the end goal of the job
- Well-structured and organized with the capacity to adopt a helicopter view
- Good oral and written communication skills in English are mandatory (French or any additional language is a plus)
- Knowledge of Tableau Software is a plus
- Stress resistant, able to work on tight deadlines
- Problem-solving & continuous improvement mindset
- Quick learner

- Ability to work independently

Finally, the candidate should share our company values:

- Strong commitment to quality
- Team player
- Work hard & play hard
- Commitment to deliver
- Honesty
